

Tank- and Filter unit

for start hole EDM drilling machine

External tank- and filter unit

TFA-200

Advantages:

- ➔ applicable to all types of EDM small hole drilling machines without any modification
- ➔ prepared of easiest connection
- ➔ robust, solid design, made of stainless steel of 2 mm thickness
- ➔ use of standard filters

dimensions:	1150 mm x 400 mm x 1100 mm
volume of tank:	200 litres
type:	stainless steel tank with 2 chambers (thickness of sheet metal 2 mm)

TFA-200

External tank- and filter unit

- ➔ easy access from the top, no additional tools necessary for maintenance and cleaning
- ➔ filter unit = standard filters H 500 mm Ø 300 mm
- ➔ unit of wheels, therefore easy transportable
- ➔ shut-off and control valve for additional rinsing
- ➔ drain valve for easy change of fluid
- ➔ electrical supply with splash water protected protective motor switch and CEE-plug 16/400 V
